

**Plant theft on the increase!**

We have seen a large increase in stolen plant equipment over the last few months. JCB Mini diggers seem to be in demand with 6 being stolen in a 2 day period. More Plant companies are opting for the SmarTrack Maxi TQA103 due to its internal aerials and its smaller size. There is only a few places on mini diggers to hide a device so extra care and concealment is needed while fitting.

**List of cars stolen this month alone, and over £250,000 recovered for the insurers... very happy!**

**Bailey Pageant Caravan fitted with the Alert24 KeyGuard leads to 2 arrests!**

SmarTracks SCC received alert signals from an Alert24 Keyguard at 1am in August, the caravan in question was being moved on a remote farm in the west midlands. SmarTracks Telemetric trained staff called the owner with in seconds and the owner confirmed that it must be a theft in progress. This means we have got a live one with the Police responding immediately as usual. Warwickshire Police called in 3 response units and intercepted the caravan in between motorway junctions. The thieves were not having a good evening, 2 occupants were found in the tow car and were arrested on the scene.

**3 thieves get caught in Transit van while towing a stolen caravan!**

These guys were quite surprised one afternoon around 4pm when the Police stopped them and said that they new that the Caravan was stolen! They did not realise that SmarTrack telemetric staff were tracking them live! The Police were pleased, another crime solved and arrests made.

**Martin Wallis will be joining Smartrack as a new Dealer Manager call 0845 833 6971 for further details**

**Look out for the new SMARTRACK CARAVAN**
